

Interested in learning more about beneficial insects and native pollinators and habitat that supports them?

Always wanted to learn more about Oregon's native plants and how to grow them?

Think you should be complying with farm biodiversity standards and/or signing up for those interesting conservation programs but not sure how farm biodiversity fits into your farm production plan?

Farmscaping with Native Plants Field Day

Thursday, June 11th, 2009 at the NRCS, Plant Materials Center, Corvallis Oregon
100-5:00 P.M.

The conservation experts at the Natural Resources Conservation Service Plant Materials Center in Corvallis are teaming up with Oregon State researchers, native plant retailers, and insect enthusiasts to bring you a **very special field day**. Come join us and:

- Learn first-hand the ecology and identification of native pollinators and beneficial insects
- see mature native plants that can be used in on-farm habitat
- tour a demonstration hedgerow and fields of native flowers
- learn how to propagate and grow native plants
- and visit with folks from Seven Oaks native plant nursery
